DETAILED ACTION

1. Claims 1-17 have been examined.

## Allowable Subject Matter

- 2. Claims 1-17 are allowed.
- 3. The following is an examiner's statement of reasons for allowance:

Claims 1-9 are drawn to a file processing unit. The closest prior art, Fujitsu Ltd. (Yamamoto), Japanese Patent Application Publication No. 09-146843 A, discloses a similar file processing unit. Although Yamamoto discloses security information derived in accordance with a predetermined rule (see machine translation, ¶ [0029]), he neither teaches nor suggests a first information producing unit producing first signature information, in response to a close request to close a file, using the data of the file in accordance with a predetermined rule, where the file is being used in an application that is run in a computer system. This particular feature explicitly recited in independent claim 1 renders claims 1-9 allowable.

Claims 10-13 are drawn to a file processing unit. The closest prior art, Fujitsu Ltd. (Yamamoto), Japanese Patent Application Publication No. 09-146843 A, discloses a similar file processing unit. Although Yamamoto discloses security information derived in accordance with a predetermined rule (see machine translation, ¶ [0029]), he neither shows nor motivates a second information producing unit producing second signature information, in response to an open request to open a file, using the data of the file in accordance with a predetermined rule, where the file is being used in an application that is run in a computer system. This particular feature explicitly recited in independent claim 10 renders claims 10-13 allowable.

Claims 14-17 are drawn to a file processing unit. The closest prior art, Fujitsu Ltd. (Yamamoto), Japanese Patent Application Publication No. 09-146843 A, discloses a similar file processing unit. Although Yamamoto discloses security information derived in accordance with a predetermined rule (see machine translation, ¶ [0029]), he neither teaches nor suggests a first signature information producing unit that produces first signature information in accordance with a predetermined rule using the data of the file designated by a file close event issued from the application, before the process specified by the file close event is completed in the file system. This particular feature explicitly recited in independent claim 14 renders claims 14-17 allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
